SOPHIES CONTENT PLANNER

All-in Content Planner and Research System

What this does?

This system automate Research, Facebook, Instagram, TikTok and LinkedIn content generation.

It also automates Youtube, podcast guest research, topics, ideas, and can connect to their GHL

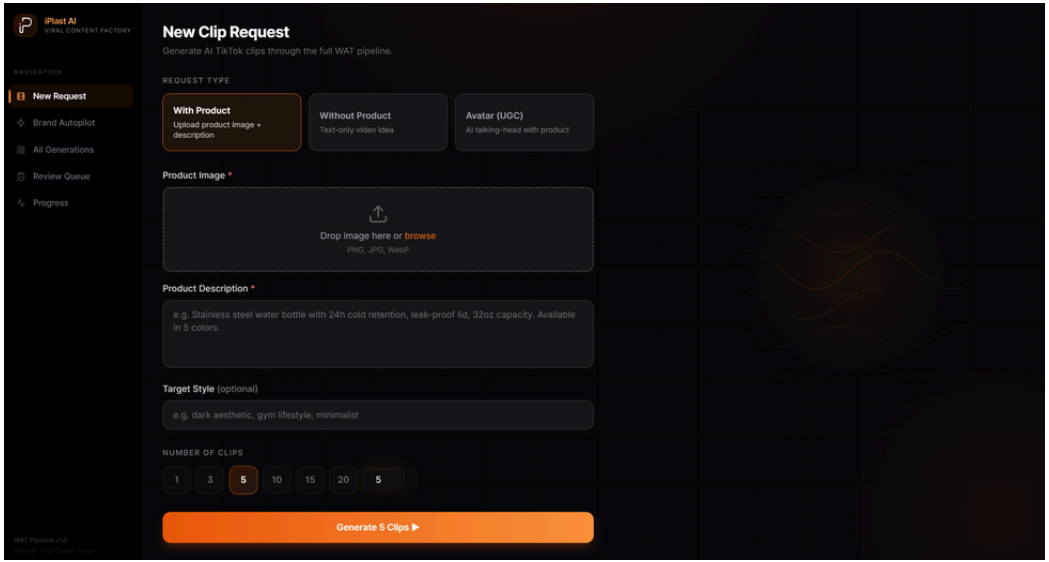

An AI-powered automation system that streamlines content research, ideation, and generation across Facebook, Instagram, TikTok, and LinkedIn.
The system automatically researches trending topics, generates content ideas, hooks, captions, and scripts, and helps businesses maintain a consistent multi-platform content strategy.

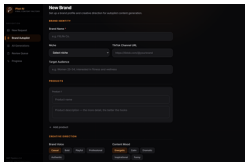

It also automates YouTube research and topic generation, as well as podcast guest research and outreach opportunities. The platform can be integrated with GoHighLevel (GHL) to connect content and marketing activities with CRM, lead nurturing, and sales workflows.

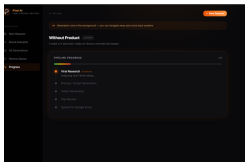

The result is a centralized AI marketing system that reduces repetitive work and helps businesses research faster, create faster, and scale their content operations.

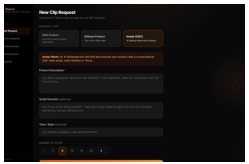

IPLAST VIRAL CONTENT FACTORY

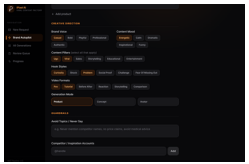

Video and Reels Content Factory

What this does?

This app is clips content factory and a reels autopilot system.

This is an internal system made for our TikTok Creative Agency client to help their non-creative staff to generate their videos with and without the product. Also allow them to enroll any brand and automate the daily reels generation based on their Brand identity, creative direction, etc.

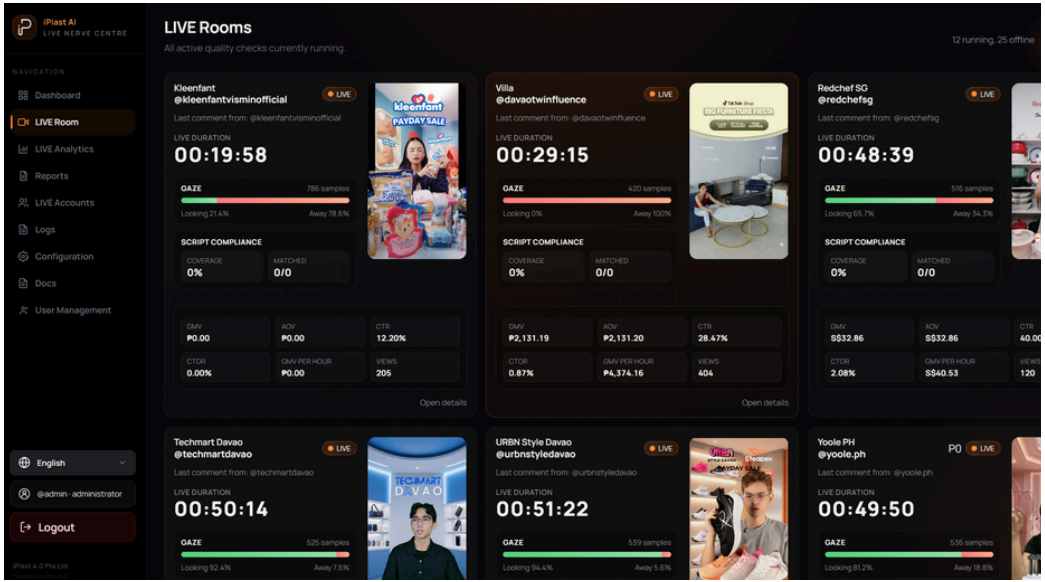

The platform enables non-creative team members to generate short-form video content with or without the physical product, using AI-generated concepts, visuals, scripts, and creative directions.

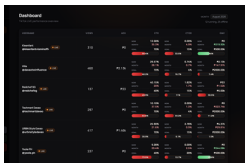

It also allows teams to enroll any brand and configure its brand identity, creative guidelines, tone, and content direction. Once set up, the system can automatically generate a daily stream of Reels and short-form content aligned with each brand.

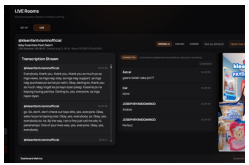

The goal is to make content production faster, more scalable, and less dependent on creative manpower while maintaining brand consistency.

IPLAST LIVE NERVE CENTRE

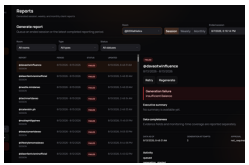

TikTok LIVE Nerve Centre

What this does?

This app monitors TikTok LIVE Stream, it can monitor LIVE host behavior and anlyze if they are looking at the camera, script compliance.

It can also display the LIVE GMV, AOV, CTR, Views, etc of the channel. This is used to analyze LIVE Host and the TikTok Channel performance. This can enroll multiple TikTok Channels and provide analytics.

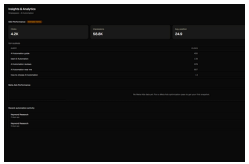

The platform uses AI to monitor LIVE streams and analyze host behavior, including camera engagement, script compliance, and on-screen performance. It also tracks key LIVE commerce metrics such as GMV, AOV, CTR, views, and other performance indicators.

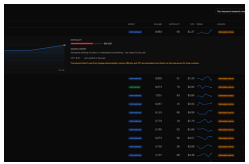

The system can enroll and monitor multiple TikTok Channels, providing a centralized dashboard to compare host performance, identify improvement opportunities, and measure overall LIVE sales performance.

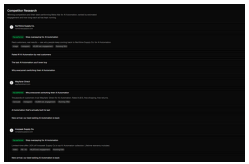

HISMILE SEO AND META ADS

SEO and Meta Ads Automation System

What this does?

This app automates SEO research, optimization and audits, Meta Ads optimization, competitor research, winning ads research, etc.

This app can sync to multiple Meta Ads account without needing integration, they just need to key-in the Ad Account ID.

The platform analyzes marketing data to identify optimization opportunities, improve campaign performance, and uncover strategies used by competitors and high-performing ads.

A key feature is its ability to connect with multiple Meta Ads accounts simply by entering the Ad Account ID, eliminating the need for complex integrations or setup processes.

The system gives marketing teams a centralized AI assistant for SEO, paid advertising, competitor intelligence, and continuous optimization.
